

# Can Hands Talk?

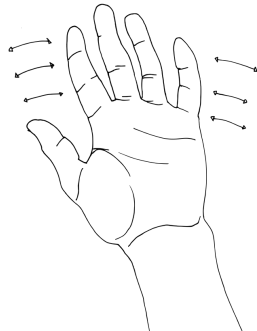

## NGUNUNGULA

*By making signals or gestures with our hands we can chat without using our mouths. Hands can help us find things, share feelings and even keep our friends safe.*

*I bet you already know how to talk with your hands. Lets give it a try!*

### Greetings

Can you say 'hello' using your hands?

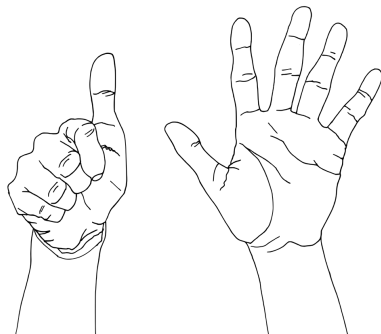

### Ok?

Can you draw hands that say 'ok'? Try a circle for the palm and lines for the fingers.

### Numbers

How many fingers are there?

### Stay safe!

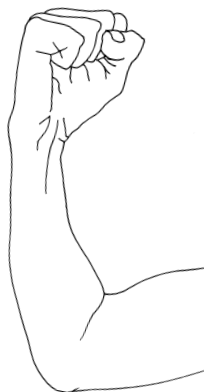

Can you draw hands that say 'stop'?

Give it a go!  
You can do it!

### Signs

What does this gesture mean? Please write your answer below. You can also turn the paper over and draw some animals you think are strong.

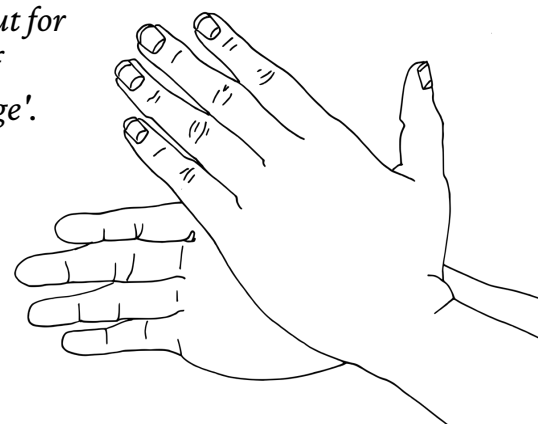

-----

### Hands in art

*In this exhibition you are going to see a lot of hands. Can you work out what they are saying in each artwork?*

*The whole body can talk in a similar way, so keep an eye out for other forms of 'body language'.*

*Give yourself a clap!  
Well done!*

### Pointing

Can you point at something important?
