Talking Hands

The exhibition you are about to see is full of hand gestures and each conveys important information about the meaning of the artwork.

So lets take a minute to talk hands. Most of the time, we don't even realise we are using gestures, but hands can tell us a lot.

Emotion

Hand gestures convey emotion. Learning to read gestures can help us better understand how others are feeling and share our own emotions. Look at the gestures on this page. Can you guess what any might mean?

If you wanted to tell someone you were happy, what might you do with your body? Can you draw a happy picture of yourself above? You can draw a stick figure if you like. Or flip over the paper and use the back if you need more room.
